WHAT WENT TO AI

AI matches and drafts, a person decides

Before: a day of searching, a designer, a copywriter

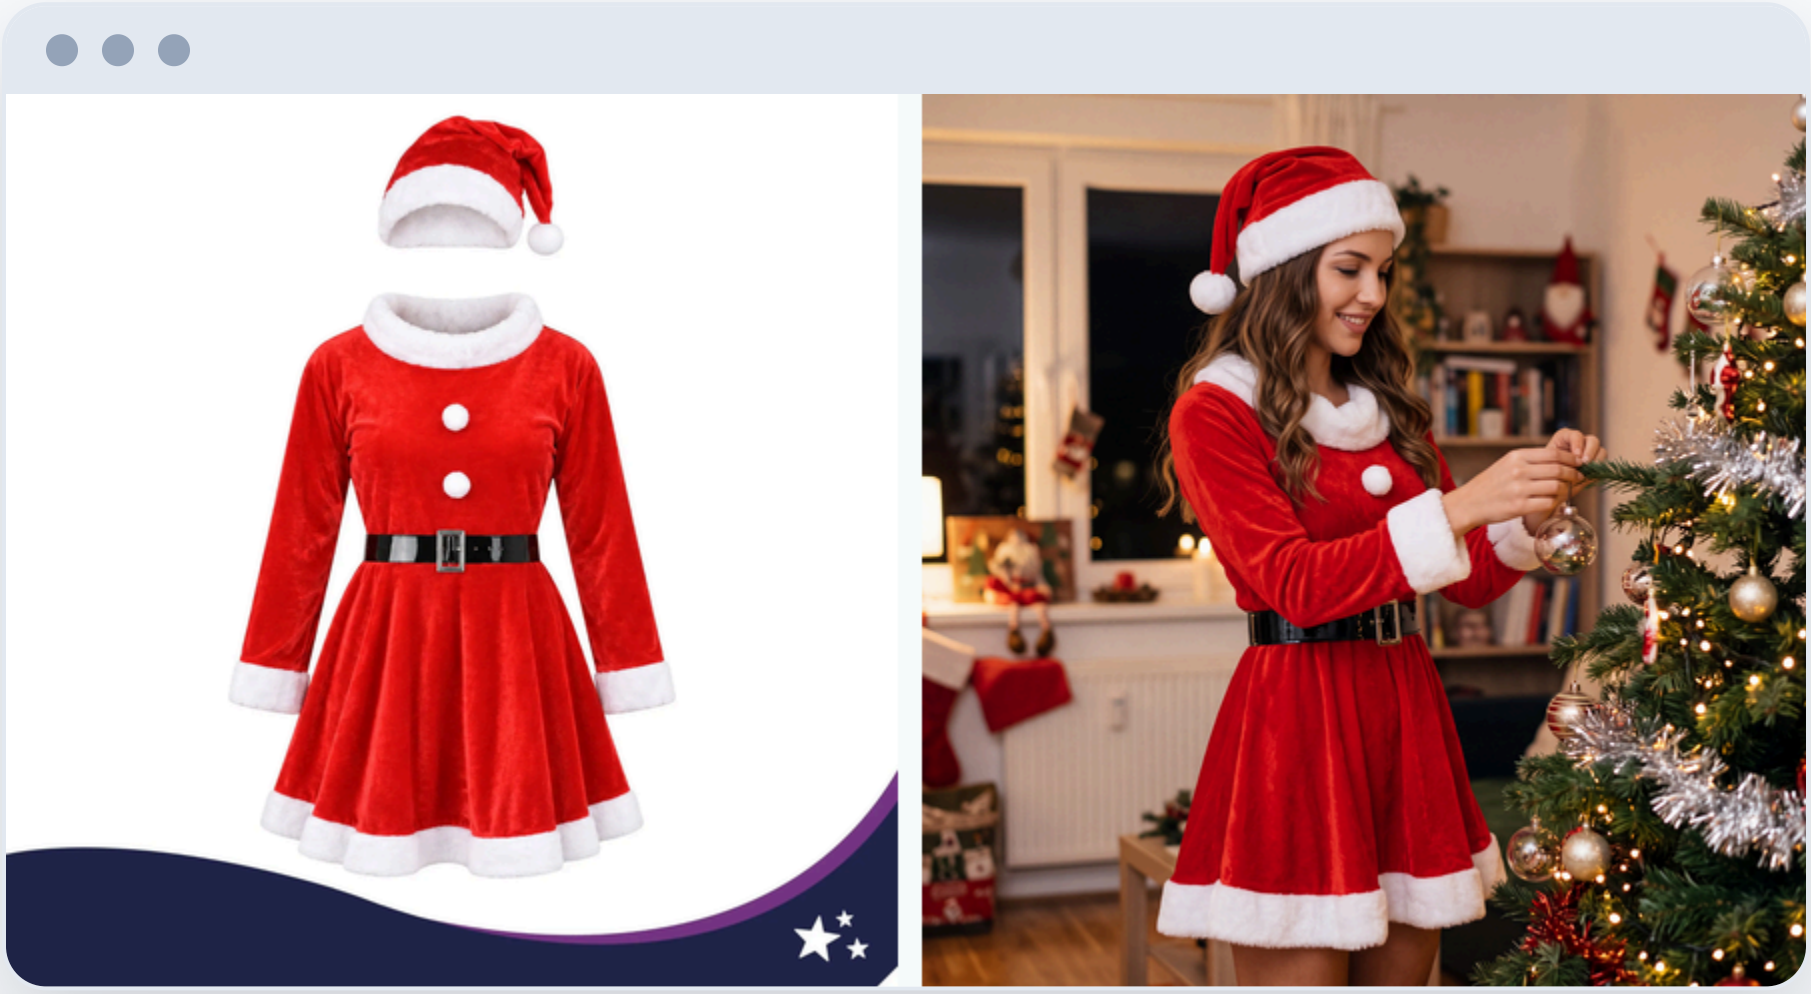

Search	**1,667 products in 4–7 min**
Listing	**a draft from AI**
Profit, inventory	**automation**
Packing	**automation**
AI code	**74%**

Code history; live-store test; "before": author's experience

BEFORE → AFTER

Supplier shot → AI scene

Left: the photo from the supplier. Right: AI drew a scene from it. A person turns the listing on.

The scene was drawn by AI and is labeled that way in the listing

HOW TO START

Start with one boring task

1. List what you do by hand every week
2. Pick one where the result is easy to check
3. Hand it to AI in full
4. AI prepares a draft, you turn it on

From the author's experience
